

Empathy Map

Date	14 July 2026
Team ID	
Project Name	HDI Predictor (Human Development Index Predictor)
Team Size	1 (Individual Project)
Maximum Marks	4 Marks

Persona: **Meera, a development-policy researcher** (Role: analyst at a regional planning office) evaluating human development outcomes.

Says

- “I need to know where this region would rank if we improved schooling.”
- “Is there a faster way than pulling the full UNDP report every time?”
- “I want to show this to my team without teaching them the HDI formula.”

Thinks

- “This has to be backed by real data, not a guess.”
- “If I change one number, how much does the outcome move?”
- “Can I trust a model I didn't build myself?”

Does

- Cross-references UNDP reports manually, country by country.
- Builds ad-hoc spreadsheets to simulate scenarios.
- Presents findings to non-technical stakeholders.

Feels

- Time-pressured when preparing reports before deadlines.
- Reassured when a tool shows its accuracy (R^2) transparently.
- Engaged when a result is visual, not just a number in a table.
